

Dear Hiring Team,

I am excited to apply for the Machine Learning Research Engineer role at Canopy Labs. With a strong background in machine learning, AI systems, and building AI-powered solutions, I am confident in my ability to contribute meaningfully to your mission and engineering goals.

My experience includes building AI agents and RAG-based AI assistants that are tailored to specific applications. I have hands-on experience with Python, PyTorch, and deploying ML models. Previously, I optimized product distribution using predictive models at Coca-Cola.

What draws me to Canopy Labs is your focus on developing digital humans that are indistinguishable from real humans. I resonate deeply with the role's emphasis on machine learning and AI research, and believe my blend of systems engineering, model optimization, and large language models makes me a strong match.

I'd welcome the opportunity to bring my skills to Canopy Labs and contribute to cutting-edge innovation. Thank you for your time and consideration. I look forward to the possibility of speaking with your team.

Sincerely,

Shreyas Katagi
